

Hi, I'm Nattharita from SIT, KMUTT. I'm studying a master degree majoring in IT. The last year I've been to Japan to attend the gPBL program at Shibaura Institute of Technology for 10 days.

The experience I've gained after participating in this program was amazing. The first day of the program it was raining, I and our friends from KMUTT went to Shibaura Institute of Technology by train and bus. I remembered that we met lots of friends from many countries such as Japan, Vietnam, China, Germany, Malaysia, Indonesia, Thailand and so on. The activities on the first day that is the opening ceremony that we got a warm welcoming and also had a campus tour. Shibaura Institute of Technology Omiya campus is not big compared to our university but there are lots of trees that impress me. I would say I love something green. After that, we were separated into a group for doing a project and I got an honor to be a leader of the group. To be honest, I was nervous and had no confidence that I can be a good leader or not. By the way, 10 days passed even I was not good enough, I want to thank my group members for working hard plus did wonderful things. For all ten days, we had a field trip going to Nasu for 2 days yet we have to do a project along with travel. It was a hard time that we went to sleep late (around 3 a.m.) and had to wake up early. However, sightseeing around, eating delicious food, experience nice weather and had new friends was worth.
