

# 2019 KMUTT Holiday School at Lunghwa University of Science and Technology

## Learning Chinese language

Teacher taught Chinese language in many lessons that can use in real life such as vocabulary, conversation, introducing myself, counting, timing, food, place, shopping, color, direction, career, hobby and so on.

Teacher made us feel like studying was not boring because they had activities in our class such as quiz race that made everyone could joined in the class, made a

cup of bubble milk tea, made a stamp, and handcraft. So, I can see that everybody participated well in activity and every class.

### Explore the new experience

About 10 days that I lived in Taiwan. I learned and found the new things from here and it was different from Thailand. First of all, it was the weather, the first day when I arrived at Taiwan the weather was raining, windy, and cold. Next day, the weather was still cold but I really liked the weather here that made me felt fresh. Even though, during the time that I lived in Taiwan did not have a sunny day because If the weather had a sunny day, it would make me feel warm. The environment here was quite clean, waste segregation, and most people always throw trash in a trash bin, it was hard to find some people throw trash on sideways. Public transport system was good that made me feel comfortable in transport. The Taiwanese food's taste was not spicy or sour as same as Thai food but it was delicious in Taiwanese style.

The staff at Lunghwa university took us to go to many places in Taiwan for cultural trips such as Yehliu, Pingxi Old Street, Shifen Waterfall, Beitou Thermal Valley, Danshui Old-street, Chiang Kai-Shek Memorial Hall, Taipei 101, and Ximending.

Moreover, I went to many night market such as Xinzhuang market street, Shilin night market, Miaokou night market, and Raohe night market. That was amazing and many kinds of local food at night market.

### The impressiveness

I impressed every staff and teacher. They always talked and take care us. Also, they suggested and helped us all the time. They prepared meal and snacks to us. Thank you very much

## **Good memories**

This is a program for learning Chinese language, culture and adjust myself to new social or new environment. Chinese language was interesting and adapt for any further chance. I like Taiwan because they can cultivate their citizen to realize the nature conservation and take care of other people. This program made me know new friends and adjust myself to live with other people that never know before. I am grateful to King Mongkut's University of Technology Thonburi for organizing this valuable program to KMUTT's students and I really appreciate that my university gave a wonderful opportunity to me to join this program. I wish the university will organize the program for learning culture in the next time.
